NIFTY FUTURES

Nifty appears to have registered a fresh breakdown as it decisively breached its near term supports. Based on our wave counts, the correction from the recent highs of 11,147 appears to be the last leg of corrective structure, which is in progress from June highs of 12,103, with logical targets present around 10,668. Besides, on long term charts strong support for Nifty is placed in the zone of 10,582–10,524, if Nifty trades below 10,700 for at least 30 minutes then intraday shorting can be considered for modest targets placed around 10,600 with a stop above intraday high
