NIFTY FUTURES

Nifty50 registered a 'Bearish Belt Hold' kind of formation as it remained under pressure from the word go. Nifty index formed a bearish candle on daily scale but managed to hold its crucial support of 10,777-10,750 zones. It has got stuck in a trading range and follow up action is missing on both the sides as dips are being bought while bounce is being sold in the market, Now the index has to continue to hold above 10,750 zones to extend its move towards 10,888 then 10,929 zones while on the downside support exists at 10,720 then 10,650 levels.

BANK NIFTY FUTURES

Bank Nifty failed to hold above 26,900 zone and comparatively traded in a narrow range of 150 points for most part of the session. It managed to hold previous day low but formed a small bearish candle on daily scale. Now it requires a decisive range breakout from the current trading band to commence the next leg of momentum. On immediate basis it has to hold above 26,850 to witness an upmove towards 27,150 then 27,350 zones while on the downside major support exists at 26,666 then 26,400 zones.
